WING JUMPS	11	AKC/ USDAA/ CPE/TDAA	Plastic composite frame; plastic jump cup strips

TEAMWORKS DOG TRAINING® LLC -- AGILITY EQUIPMENT LIST

NOTES TO JUDGES ABOUT COURSE DESIGN IN THE TEAMWORKS ARENA: There are steel support beams along the two sides of the arena that come in about 2 feet. Please leave at least 5’ clearance along each of these sides. Our “Big Ass Fan” (brand name) is hung on the ceiling, directly above the 50’ x 50’ mark. The ceiling is 16’ high, but you may **not want to place the A-frame or the dogwalk exactly in the center of the ring during hot weather**, because occasionally, a dog is afraid of the fan, and we will want to use it for cooling. Also, placing the teeter in the center can cause the teeter to lift up. There are only two gates, as noted on the map.

MISCELLANEOUS EQUIPMENT	
NUMBERS	6 sets of numbers –in different colors as well as three sets of A,B, C in several colors
MEASURING	1 measuring wheels, 3 ground line tape measures
TIMERS	2 sets of game horns & electronic timers (waterproof); two headset microphones
WICKETS	1 official AKC/USDAA M.A.D. wicket; 1 measuring table
MISC.	Shaded crating areas; shaded warm up jump areas with turf
GROUNDS	Indoor bathrooms. Fenced dog exercise area and fenced warm-up jump areas. Ample parking & covered crating areas; 100’x 60’doggie swimming pond & regulation dock diving dock
OTHER BUILDINGS	Pavillion is a 25x41 foot mini-arena with sprint turf for a warm-up jump during a trial. Clubhouse is 12 x 20 with window air conditioner unit, lights, several power outlets, full-sized refridgerator, tables and chairs, indoor/outdoor carpeting, dog crates. Clubhouse has a 12 x 20 overhang used for hospitality.
